

The Jo Fold

Adjusted for a bigger baby

Lay the nappy out in a flat square

Fold one corner towards but not as far as the middle

Then the next corner

And the next corner

And finally the last corner

Rotate the whole thing around so the flat edge is at the bottom

Fold a third of the nappy into the middle

And then the other side into the middle

Take the top corner and fan it out to create a wing

Then do the same to the other side

Place the baby on the nappy and pull the bottom of the nappy up

Bring the wing around the baby to the front

And then the other one

Fasten with a nappy nipple

Add a waterproof wrap

And fasten
