

# The Gaynor Fold

Lay the nappy out in a flat square

Rotate it 45 degrees so a point is facing you

Bring the top point down and about 10cm past the bottom point

Take the bottom corner (top layer only) and lift up.

Fold in half from right to left

Rotate 90 degrees so the flat edge is at the top

Place the baby on the nappy and pull the bottom of the nappy up

Fold the right wing over

Fold the left wing over

Fasten with a nappy nipper

Tuck the excess middle fabric down

At the moment the nappy comes low down on the child's legs

Tuck the right leg up, rolling the edge inward

Repeat for the left leg

Sit back and admire your work

Before adding a waterproof wrap
